

Adam Figgat

Senior Full-Stack Software Engineer

Utah | afiggat@gmail.com | 760-814-7652 | LinkedIn: linkedin.com/in/adam-figgat

Professional Summary

Senior-level Full-Stack Software Engineer with 9+ years of experience delivering enterprise applications across fintech and healthcare. Expert in React, Angular, TypeScript, GraphQL, and Node.js with a track record of owning product areas, leading front-end initiatives, and delivering scalable customer experiences. Champion AI-driven development using Claude Code and GitHub Copilot to accelerate delivery, improve code quality, generate tests, and increase engineering velocity while maintaining clean, maintainable software.

Core Competencies

Technical Leadership, Product Ownership, Full-Stack Development, Front-End Architecture, React, Angular, TypeScript, GraphQL, Node.js, Elixir, AI-Assisted Development, FinTech, Healthcare, Agile

Technical Skills

Frontend: React, Angular, React Native, TypeScript, JavaScript, HTML/CSS, Material UI

Backend: Node.js, GraphQL, REST APIs, Elixir

AI: Claude Code, GitHub Copilot, Prompt Engineering, AI-assisted Development

Tools: Git, GitHub, Bitbucket, Jest, SendGrid, Figma

Professional Experience

Software Engineer II | BILL (formerly Divvy) | Dec 2021 – Jul 2026

- Owned multiple Invoice Financing onboarding experiences and key Line of Credit initiatives, leading front-end implementation from design through delivery using React, Angular, TypeScript, and GraphQL.
- Owned the front end portion of the Invoice Financing SendGrid ecosystem, supporting the delivery of 15+ million transactional emails each month across onboarding, funding, repayment, and customer lifecycle communications.
- Maintained and extended a production Elixir service, adding schema and query support for new fields across product expansions and resolving defects.
- Led cross-functional development efforts with engineering, product, design, operations, and compliance teams to deliver scalable financial products while influencing architecture and implementation strategy.
- Mentored engineers, reviewed code, and regularly led implementation efforts, operating in a senior-level capacity across projects
- Championed AI-driven development practices by leveraging Claude Code and GitHub Copilot to accelerate feature development, prototype solutions, generate tests, refactor complex code, and improve engineering velocity while maintaining high code quality.

Software Engineer | Intermountain Health | Jun 2019 – Dec 2021

- Helped modernize enterprise healthcare applications by contributing to the migration from Angular to React.
- Delivered patient billing, financial assistance, pre-registration, and COVID-19 applications using React, React Native, TypeScript, and GraphQL and built reusable front-end architecture with cross-functional Agile teams to deliver secure patient experiences.

Earlier Experience

Younique — Front-End Software Engineer (2018–2019)

- Developed React-based e-commerce applications and reusable UI components for a global platform.

VisualCue — Front-End Developer (2017–2018)

- Built responsive websites and digital experiences using HTML, CSS, JavaScript, and WordPress.

Education

B.S. Business Management & Marketing, Brigham Young University–Idaho - 2012

DevMountain Web Development Immersive Program - 2017
